## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "perhaps" in claim 10 is a relative term which renders the claim indefinite. The term "perhaps" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear as to whether the step (point-of-sale management units) is claimed, thus rendering the scope of the claims unclear and indefinite.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3629

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Henrick.

Henrick teaches a method of selling services and/or products using a communications link (Title), wherein the user selects a provider's product (fig 3, 312), transmits an identification code (fig 2, 208), the provider sends codes to a code verification system (414, fig 4), the system triggers a non-contact code verification (this results in 416 in fig 4), and granting access to the user upon code verification (420 in fig 4).

Henrick does not specifically mention a "non-contact, proximity code", however, there is disclosed a code that is transmitted from a wireless device. Thus meeting the limitation of "non-contact" and "proximity" as defined in the specification.

As to claims 2-4, the communications links are shown to be a mobile telephone network or other wireless network (abstract, lines 4 and 5).

As to claim 5, the code would be issued for a user for a limited time (as long as the user keeps an account current).

As to claim 6, the user calls the system, thereby enabling the link.

As to claim 7, telephone networks are well known to use optical cable, thereby meeting the limitations as claimed.

As to claim 8, the code would be released by selective activation (upon receipt of an order by a user.)

As to claim 9, Henrick discloses a central, mainframe, processing system (web server).

As to claim 10, the mainframe would inherently be equipped with a data telecommunications interface (modem, to connect to the Internet).

As to claim 11, the method could be used for other items than songs, such as reserved parking space, the information processed would be reservation information.

As to claim 12, an accounting statement would be automatically generated (it would be inherent that a bill would be generated.)

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US PAT 6,568,595 to Russell et al., Russell et al. disclose a method for carrying out electronic commerce over the internet, US PAT 6,640,098 to Roundtree, Roundtree discloses electronic commerce over a wireless network.
